

August 29, 2013

My name is Nancy B. Akers and I am a life long resident of Camden. I would like to register my deep concern for the proposed zoning changes associated with Fox Hill Properties LLC. In my opinion, their proposal for a rehab facility for drugs and alcohol would not be the proper use for the following reasons: This is a neighborhood of exclusive, high end properties whose values would be jeopardized should a rehabilitation facility be built. Existing homeowners invested in their properties with every assurance of living in a safe, established community. Additional impact from this type of facility, specifically, increase in traffic flow, lack of sidewalks and lighting, would also reduce property values and have a negative impact on the immediate neighborhood. There are places in our community for this types of facility but I believe this is not one of them.
